

EVERHARD

Welcome to Everhard

Founded in 1926 by Alfred T. Davis, Everhard Industries started in Brisbane making quality laundry products for Australian homes. Over time, the business expanded into kitchen and bathroom solutions, then into outdoor spaces, drainage systems, water treatment, and civil infrastructure.

Nearly 100 years later, we're still proudly family-owned and Australian-made, with a strong focus on craftsmanship, sustainability, and supporting local manufacturing. Our history is one of growth, resilience, and staying connected to the people and communities we serve.

1926

Alfred T. Davis and his business partner founded Queensland's inaugural laundry manufacturing company in Bulimba, Queensland.

1950

With the expansion of manufacturing in Australia, Everhard is purchasing land for additional manufacturing sites and distribution centres in Queensland.

1970

New machinery makes Everhard the first company in the Southern Hemisphere to release polymer laundry tubs, allowing Everhard to become a national distributor.

1990

Everhard commissioned one of the world's largest plastic injection molding machines, the Hemscheidt. This enabled the production of the 4000L polymer tank.

2019

A new Head Office and Concrete Factory enable the consolidation of all Brisbane operations onto one site. This is a big step forward in supporting Everhard's future.

NOW

Everhard invests millions of dollars in new machinery to support business growth, most notably the \$5 million investment in the 5500-tonne injection moulding machine.

Our Growth

150+

Employees have joined our team from across the nation.

6

Warehouses are located nationwide, with the head office and main manufacturing in Geebung, Queensland.

~ 1,000,000

Metres of EasyDRAIN are installed in Australian homes every year.

~ 200,000

Everhard Laundry Units are proudly installed in homes across Australia each year.

~ 2,280

Tonnes of polymer are recycled by us every year, turning waste into everyday products for Australians. Our dedication to sustainability is central to all our efforts.

Our Organisation

Our Accreditations

CATEGORY	STANDARD
Quality Management	ISO 9001:2015
Work Health & Safety	AS/NZS 4801 (or ISO 45001)
Product / Industry Compliance	AS 3600, AS 3735, AS/NZS 4058, AS 5100
Concrete / Precast Standards	MRTS70, MRTS72, AS 1379

WHY IT MATTERS

Ensures consistent, traceable, and independently audited processes across our operations.

Demonstrates a proven commitment to safe workplaces, risk control, and regulatory compliance.

Guarantees our products are engineered and manufactured to meet recognised national technical and safety standards.

Demonstrates our capability to supply government and major infrastructure projects with fully compliant precast and concrete solutions. Accredited by the Queensland Department of Transport and Main Roads (TMR), confirming that our products meet strict state infrastructure requirements.

Our Manufacturing

Our Brisbane factory includes a collection of 11 injection moulding machines, all of which are managed by a team of skilled operators and certified tool setters. These machines include:

- + 90T
- + 180T with integrated robot
- + 320T with integrated robot
- + 480T with integrated robot
- + 1000T with integrated robot
- + 1200T x 2 machines, both with integrated robots
- + 1600T x 2 machines, both with integrated robots
- + 2100T with integrated robot
- + 5500T with integrated robot
- + Roto Moulder Tri Arm

Our plastics factory also includes a Ferry Rotomoulding Machine that can manufacture a range of different sized parts. We can manufacture various plastics based on your project needs and possess an extensive supply chain for raw materials. This includes, but is not limited to, Polyethylene (PE)—both High-density polyethylene (HDPE) and Low-density polyethylene (LDPE)—Polypropylene (PP), and Acrylonitrile Butadiene Styrene (ABS).

Our Product Range

DRAINAGE

Everhard's Drainage Range handles surface water where it is out of sight, like down the side of homes, behind retaining walls, or under garden taps. Made in Australia from 100% recycled polymer, it is tough, reliable, and built to last.

INTERIOR

Our Interior Range combines style and function for everyday spaces. Featuring laundry units, sinks, and tubs, it is designed to blend seamlessly into modern Australian homes while delivering practical, durable performance.

WATER TREATMENT

Everhard's Water Treatment Range provides sustainable solutions for residential, commercial, and industrial wastewater management. Systems like the Aqua Advanced AWTS protect waterways, meet environmental standards, and are proudly Australian-made.
